## KENYON'S

*Stained Glass Factory, Inc.*

"Manufacturers of insulated glass products for the window and door industry"

# Mississippi Collection

The Mississippi Collection features stained glass designs binded with your choice of caming. Units are triple pane insulated with an overall thickness option of 3/4", 7/8" or 1". Silver, gold or black aluminum spacers filled with desiccant beads are used to match your caming selection. All our products are lead-free and comply with California's proposition 65. Colored and texture glass, caming and shape options can be viewed on pages 15 through 18.

Units can be tempered or annealed, however units exceeding 15sqft must be tempered for safety reasons. Maximum size for this collection is 25 sqft. All of our designs can be modified to satisfy your customer's personal requests. Lead-time is 7 to 10 business days.

# Atlantic Coast Collection

The Atlantic Coast Collection is "New to the Market" featuring innovative, but functional designs for the most common window...the Double Hung. Stained glass designs are held together by your coming choice. All Atlantic Coast units are triple pane with a choice of 3/4", 7/8", and 1" overall thickness. A silver, gold or black aluminum spacer filled with desiccant is used to match your selection. Colored glass and coming options can be viewed on pages 15 through 18.

Units can be tempered or annealed, however units larger than 15 sqft must be tempered for safety reasons. Maximum size for this collection is 25sqft. Atlantic Coast units are sold as a pair of sashes to include Top & Bottom. All of our designs can be modified to meet your individual needs. Lead-time is 7 to 10 business days.

# Glass Options

# Colorado Collection

The Colorado Collection is an assortment of laminated designs. These units are made with two pieces of 1/8" thick glass with the design encased in between. Colorado designs are not insulated, unless requested, and have an overall thickness of 1/4". Units can be tempered or annealed, however the laminating process gives strength and break resistant qualities to the glass. Laminated glass is 40% sound deadening and blocks 99% of harmful UV rays. This conserves energy making them beautiful and efficient. Obscure textured glass can be used for privacy requests. Maximum size for this collection is 15sqft. Designs may vary based on custom size. Color options are shown below and shape options can be viewed on page 15. This laminated product is a decorative, high strength and low cost product. Lead time is 7 to 10 business days.

# Rocky Mountain Collection

The Rocky Mountain Collection is an assortment of V-GROOVE glass designs. All designs in this collection are produced on a single piece of 3/16" thick glass. The most common and the standard groove width is 3/8" (or 10mm). There are three grooving options to choose from: Polished, Frosted, and Silhouette. Polished grooves present subtle appearances, similar to a bevel. Frosted grooves have a softer charm with a silky white appearance. The Silhouette offers balance between the faintly polished grooves by delicately outlining them with frost. Our grooving process does not groove to the edge of the glass...instead there is a 1/2" space from the edge of glass to the groove line for framing purposes.

Rocky Mountain designs are not usually insulated, however they can be if requested. Maximum size for this collection is 25 sqft. Designs can be tempered or annealed, although units exceeding 15 sqft must be tempered for safety reasons. Grooved designs could differ based on custom size and shape. Standard guidelines for grooved designs can be set-up based on customer's needs. Shape options can be viewed on page 15 and groove options are shown on page 26. Grooved units have a shorter lead-time of 5 to 7 business days.
