QuickShip

32", 34" & 36" Width

Many doors inside this catalog are available as part of our QuickShip program, which means they will ship within two weeks of your standard order cutoff date. Look for the QuickShip symbol to designate these products. Ask your Wincore representative for more details.

QS

STORMFORCE

Wincore **STORMFORCE** doors are designed specifically for coastal area homes and comply with High Velocity Hurricane Zones (HVHZ) or Wind-Borne Debris region (WBD). This hurricane symbol indicates availability. Details can be found on pages 82-89.

SEVERE WEATHER GLASS

Select styles of Wincore Entry Doors are available with Severe Weather Laminated Glass. The lightning bolt symbol indicates availability. Details can be found on pages 82-89.

Quality Production Before Production Even Begins.

To make great windows and doors, you need more than great people. You need a great place to work. And that's exactly what you'll find when you visit our advanced manufacturing facility. Skillfully designed by process managers who know how windows and entry doors should be made, every step in our manufacturing process is streamlined for maximum efficiency while allowing the opportunity for handcrafted detailing by an experienced production team. So, whether it is an order for five hundred windows or five entry doors, each and every customer is assured of quality-built, on-time orders manufactured with skill and care. Granted, there are larger manufacturers out there with even larger facilities that can make more products in a day than we can in a week. But to us, it's not about being the biggest. It's about being the best. After all, isn't that the way it should be?

Special thanks to *Window & Door* magazine for recognizing Wincore® Windows and Doors as one of their Top 100 Manufacturers.

We're Not
Only Building
Windows & Doors.

We're Building
Hope.

Wincore is proud to support Tough Enough to Wear Pink™, a non-profit organization diligently working toward fundraising for breast cancer research. Which means every window and door we make helps bring us one step closer to a cure. Find out more at www.wincorewindows.com.

Approved By Those Who Know.

Texas Department of Insurance (TDI)

Many Wincore products have been approved for use by the Texas Department of Insurance (TDI).

Florida Building Commission (FBC)

Many Wincore products have been approved for use by the Florida Building Commission (FBC).

National Accreditation & Management Institute (NAMI)

Wincore is an active participant in the nationally recognized NAMI Structural Certification Program, NAMI Insulated Glass Certification Program, and NAMI Fire Door Certification Program. All programs are accredited by both the American National Standards Institute (ANSI) and the International Accreditation Services (IAS).

National Fenestration Rating Council (NFRC)

Wincore is an NFRC Member and actively participates in the nationally recognized NFRC Certification Program, which validates all thermal performance metrics. As an Energy Star Partner, Wincore also actively participates in the NFRC Independent Verification Program (IVP).

Proud To Be Called An ENERGY STAR® Partner

Today, many companies promise to make energy efficiency a priority. And when you see the ENERGY STAR® symbol, you're guaranteed those promises are true. As an ENERGY STAR® partner, under the guidance of the U.S. Environmental Protection Agency (EPA) and the Department of Energy (DOE), Wincore® has agreed to:

Build energy-efficient products that have been tested and certified in accordance with the guidelines set forth by the ENERGY STAR® Partnership program.

Manufacture each product with attention to increasing overall energy efficiency.

Inspire trust in the ENERGY STAR® symbol through quality, high-performing products.

Additional information about ENERGY STAR® can be found at energystar.gov.

Door Textures

Fiberglass doors are available in three finish textures.
Not all door styles or sizes are available in all textures.

Quality Construction

Fiberglass Entry Doors

WINCORE[®]
WINDOWS & DOORS

Full Lite Smooth Door and Full Sidelite in Black with Rectangle Transom, all with London Glass. Camelot handleset and deadbolt in Satin Nickel

Composite Frame System

Composite door frames are an innovative new alternative to traditional finger-jointed wood door frames. Research proves full-length composite door frames combine the strength and convenience of wood door frames with enhanced properties that make them moisture- and insect-resistant. The composite, rot-free polyfiber door frame will last years after wooden frames have deteriorated. Composite polyfiber frames will never absorb moisture, splinter or rot like wood door frames, or rust like metal door frames. And on Wincore® Fiberglass Entry Doors, they are a standard feature.

- Low maintenance
- Resistance to wear, splitting and impact
- Excellent nail and screw holding strength
- Great paint, stain and glue adhesion
- Can be installed below grade or to masonry
- Does not promote mold or mildew
- Moisture and termite proof material
- Lifetime warranty for rot, decay and insects

Wood Frame

Composite Frame

The Only Thing More Beautiful Than The Outside Is The Inside.

Patented Hydroshield Technology™

Exclusive HydroShield Technology™ features fiberglass reinforced door skins, full-length composite stiles and composite top and bottom rails to prevent water infiltration on all six sides.

Composite Top And Bottom Rails

Additional non-porous protection keeps water from seeping into the door and helps prevent mold and mildew.

Fiberglass Reinforced Skin

Fiberglass is unmarred by the wear and tear of everyday use and is unaffected by moisture and humidity. The doors will not rot, splinter or warp like wood, and won't dent or delaminate like steel.

Full-Length Composite Stiles

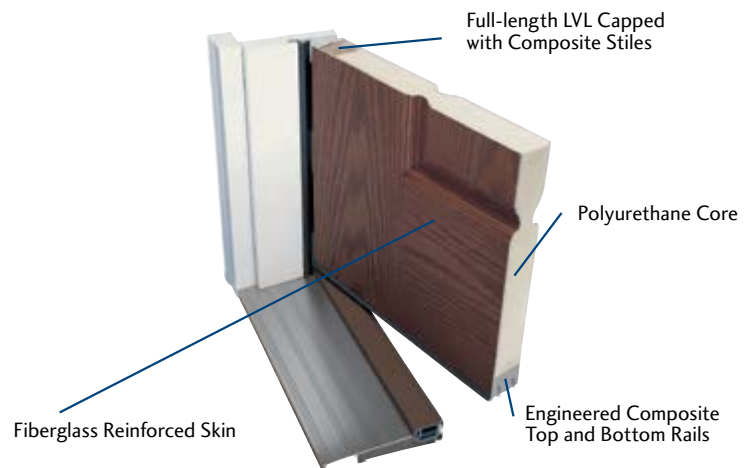

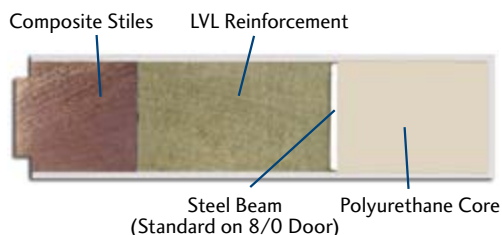

Entry doors feature full composite stiles to prevent water infiltration into the door's insulation and full-length LVL to ensure the door will never warp, rot or rust.

Architecturally Correct Proportions

Beautifully detailed panels replicate traditional wood door construction to create crisper shadow lines and enhanced curb appeal.

Insulated Core

Environmentally friendly insulation is 100% CFC-free and provides a high R-value for maximum thermal protection.

Key Features

Fiberglass Entry Doors

Beautiful, Even Finish

HAPS-free (Hazardous Air Pollutants) paints and stains are applied by highly-trained, skilled craftsmen in a climate-controlled environment. Wincore® doors are protected with a clear coat and oven-cured for maximum durability.

Insulated Core

Entry systems feature an environmentally-friendly insulation that is 100% CFC-free (Chloro Fluoro Carbon) to provide a high R-value for maximum thermal protection.

Improved Door Frames

Composite polyfiber frames will never absorb moisture or splinter. Wincore's standard composite frame will not rot like their wood counterpart, nor will they rust like a steel framed door.

Rot-free Brickmould

A Wincore® standard, brickmould is constructed of a durable composite material to resist rot, decay and damage from insects. Customizable up to 4".

Security Strike Plate

Where applicable, a steel security strike plate adds extra strength to help prevent forced entry.

Security Protection

Grade 1 is the highest level of security for residential deadbolts.

Dust Box

The dust box, located beneath the deadbolt strike, provides a barrier to air infiltration and also conceals the deadbolt latch.

Photo 2: Mission Ridge Four Panel Smooth Camber Top door with full sidelites in Black. Century Handleset in Satin Nickel.

Ball Bearing Hinges

Ball bearing hinges are standard for inswing doors – featuring four-point attachments to the door and the door frame for a lifetime of dependability. For certain applications (like French Doors), adjustable hinges are also available.

Advanced Sill Design

The sill's innovative design prevents rotting, warping or deterioration over time. Incorporating a high dam overlap cap in addition to the 1-3/8" sill height creates a tough barrier against water penetration. Door sills are available in mill finish, satin nickel and bronze.

Door Bottom Sweep

The double bulb sweep maintains maximum surface contact with the threshold rail, consistently outperforming competitive products by encapsulating both the outside and inside edges of the rail.

Weathertight Seal

Energy efficient Q-Lon weather stripping provides a weathertight seal along the sides and top of the door frame and interlocks with the Simple Solution Corner Pad ensuring the most energy efficient seal available for keeping moisture, air and dirt out of your home.

Doorlite Frame

High-performance, doorlite frames are heat-resistant and will not warp, crack or fail to adhere to the door, even in most intense climates.

Doorlites

Doorlites add beauty, natural light and curb appeal to your home, but can also answer your specific needs for light control, privacy and outdoor visibility. Handcrafted decorative glass is individually unique – no two are ever alike.

Hardware

Standard hardware is manufactured by the most recognized name in entry door security – Schlage. Schlage hardware is durable, stylish and available in multiple finishes.

A Revolutionary "One Size Fits All" System That's Anything But.

Every home and entry door is different. And although adding sidelites can often turn an ordinary entry into something extraordinary, they can often present unique challenges for a precise installation. That's why Wincore Entry Systems feature a completely customizable system to ensure a super strong, tight fit.

Jamb Options

All Wincore® entry doors have a standard jamb depth of 4-9/16". For deeper wall construction, extensions can be added to the jamb up to a total jamb depth of 10" for inswing doors and 8-9/16" for outswing doors. The extensions are applied at the factory in 1/8" increments.

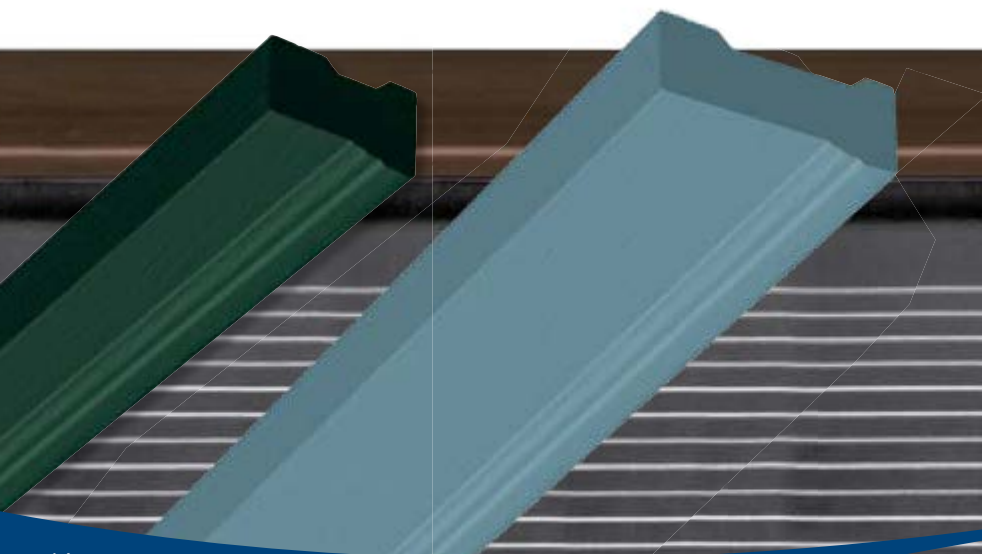

Continuous Head & Sill

While most entry system manufacturers simply install sidelites as separate units (a method that can often result in sagging or loose sidelites after a period of time), Wincore's continuous head and sill strategy helps to retain strength and rigidity for the lifetime of the door. The head board of the entry system is one piece that continues above the mullions to provide additional strength along the entire head of the unit. Simultaneously, the one-piece sill continues underneath the mullions to provide additional strength along the entire base of the unit.

Customized Brickmould Width

On entry system projects, the standard 2" brickmould may not be wide enough to fill the void that remains after that old door is removed. That's why Wincore® Entry Systems provides composite brickmould in custom Width up to 4". Prefinished brickmould is available in both oak grain and smooth finishes and can be stained (oak grain only) or painted.

Customize Your Mullions

Every opening is unique. Customizing the width of Wincore® doors with sidelite(s) allows you to fit your door to the opening, instead of modifying your opening to fit the door. Mullions are comprised of the same rigid composite material as the door's jambs.

Which means they will not warp or decay and are resistant to insect damage. Located between the door and sidelite(s), mullions ensure a perfect fit and are finished to match the perimeter door frame. The width of each mullion can spread from 3/4" up to a maximum of 3".

Craftsman Style

Fiberglass Entry Doors

*Photo: 3 Panel Craftsman Door and Full Sidelite with Vintage Craftsman Glass finished in Natural Oak.
Addison handleset and deadbolt in Black.*

Inspired by the design principles of American Craftsman architecture, the Craftsman Series doorlites add authenticity to a Craftsman, Mission, Bungalow or Cottage style home. Craftsman Series doors are available with decorative or Low E glass, as well as SDL options. Glass size and frame profile are specific to the Craftsman Series.

For an authentic appearance, Craftsman style doors are available with an optional Dentil Shelf on the interior or exterior of the door.

French Double Doors

Fiberglass Entry Doors

Easy Operation

On French Double Door Systems, Astragals are locked and unlocked with fingertip adjustments

Wincore® Entry Door systems are available as French Double Doors. When ordered in this style, Entry Doors feature an astragal pre-assembled into the door frame. When locked using the durable steel lock pins at the head and sill of the unit, the astragal keeps one panel of the entry system locked in place, while allowing the other door panel to open and close. With the astragal unlocked, both door panels open and close freely.

Eclipse Multipoint Hardware in Bright Brass. Faux handleset and deadbolt on passive panel.*

Fiberglass Patio Doors

Fiberglass Entry Doors

Two Panel & Three Panel Styles

Patio Doors are available in a two panel or three panel door configuration. On two panel patio doors, one panel is operational while the other remains fixed. On three panel patio doors, two panels remain fixed while the remaining panel is fully operational. A heavy duty top-hung aluminum screen frame (available in seven popular colors) with fiberglass mesh allows for virtually effortless operation*. Patio doors are available with any of the decorative glass patterns that fit Full Lite door styles shown on the following pages.

Screen Colors

* Outswing Patio Doors are not available with screens. Every effort has been made to reproduce colors accurately. But, due to the printing process, variances do occur. Please consult your representative prior to ordering.

VIBE 1L Vertical

Retro. Modern. And totally hip.

Introducing the Vibe Collection. A series of Wincore® Fiberglass Entry Doors honoring mid-century architecture as well a modern aesthetic. Available in a smooth or oak woodgrain texture with Classic Low E, Frosted or Rain Glass, doors from the Vibe Collection turn an entry door into a focal point. With a variety of glass shapes, choose from ten distinctive door options.

LOW E GLASS

RAIN GLASS

FROSTED GLASS

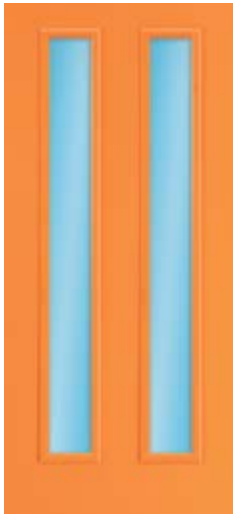

When the door style has the doorlight offset towards the left or the right of center (Ex: VIBE 1L Vertical), the doorlight will be located on the strike side of the door slab, closest to the door handle.

When the door style has 'stepped' doorlight design (Ex: VIBE 3L Vertical Stepped), the door handle is located on the side where the lite is closest to the handle. This places the lite closest to the top of the slab, on the hinge side of the door.

Riverwood

Decorative Glass Pattern

Riverwood marries a touch of history with the contemporary. An excellent choice for craftsman style homes or bungalows, micro-iced granite, thin reed and soft wave glass are highlighted by diamond bevels and patina caming.

When the door style has the doorlight offset towards the left or the right of center (Ex: VIBE 1L Vertical), the doorlight will be located on the strike side of the door slab, closest to the door handle.

When the door style has 'stepped' doorlight design (Ex: VIBE 3L Vertical Stepped), the door handle is located on the side where the lite is closest to the handle. This places the lite closest to the top of the slab, on the hinge side of the door.

Ventlites

Offering the best in performance and energy efficiency, Ventlites bring functionality into an attractive design. The bottom sash of the insert unit moves smoothly up and down for optimum ventilation. The solar shield frame is UV resistant and also resists yellowing and cracking. Patented screw hole covers offer a smooth interior. Comes with screen. Ventlite is available in white only.

STORMFORCE

Impact Fiberglass Entry Doors

WINCORE®
WINDOWS & DOORS

Impact Fiberglass Entry Doors

In coastal areas, having the right protection for your home is very important. That's why the engineering behind the STORMFORCE impact-resistant package for select fiberglass entry doors provides you with peace of mind. With key features like thicker door panel skins, composite frames, rugged hinges and laminated glass, entry systems with STORMFORCE package enhancements can stand up to Mother Nature year after year.

Key Features

Laminated doorglass provides protection against damaging wind-borne debris

Aluminum doorlite frame provides the ultimate durability in extreme weather conditions

Door panel has an insulated core and 1/8" thick fiberglass door skin in a woodgrain texture

Heavy-duty stainless steel hinges resist corrosion

Composite frame system resists rot, decay and insects

Pre-hung in 4-9/16" composite frame

Beautiful, even finish in choice of 10 stain finishes and 21 designer paint colors

Schlage Grade 1 residential single cylinder deadbolt and Grade 2 residential locksets

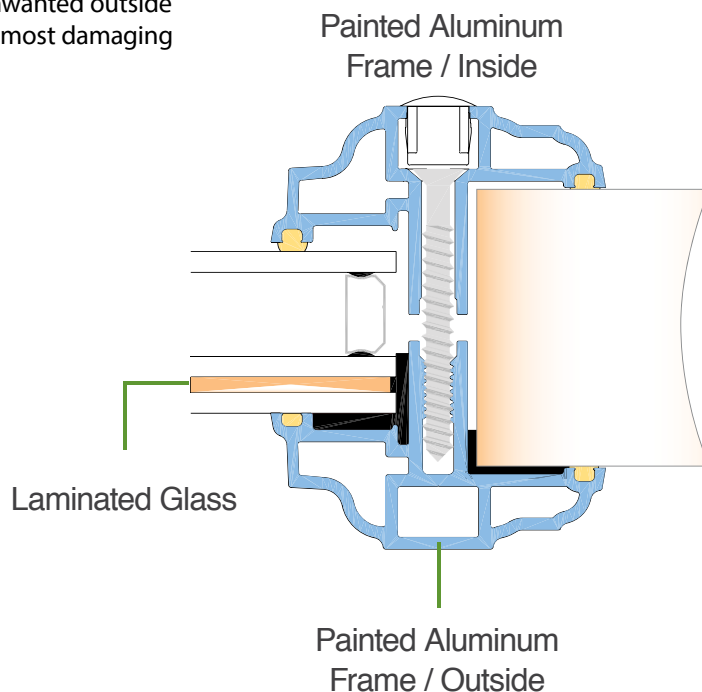

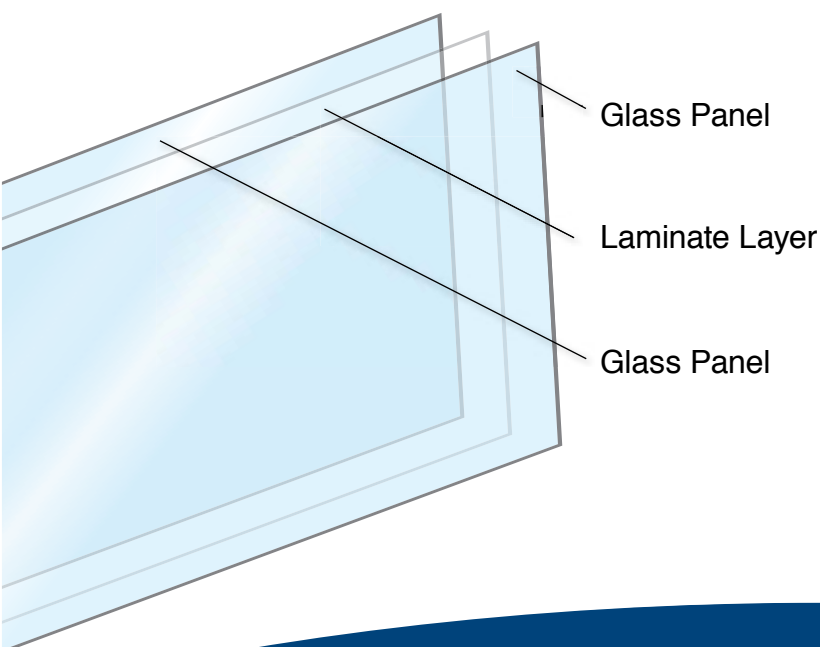

Severe Weather Laminated Glass Option

Severe Weather Laminated Glass is available on select non-impact rated door styles. The lightning bolt symbol indicates availability.

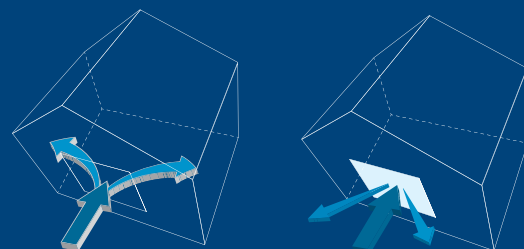

Impact-resistant Laminated Glass

When it comes to impact-resistant doors for coastal areas, the frame system, laminated glass and sealant must work together to resist the catastrophic forces applied during severe weather. STORMFORCE Fiberglass Entry Systems do just that. Similar to the glass used in car windshields and aircraft windows, the insulating glass features an impact-resistant plastic interlayer that is bonded between two pieces of glass under heat and pressure. The interlayer remains adhered to the glass fragments and resists penetration, even if the glass pane is broken – protecting against flying debris and hurricane-force winds. In addition, laminated glass guards against forced entry – resisting repeated impacts from hammers, bricks or similar weapons. It also helps to control unwanted outside noise from entering the home and filters out 99% of the sun's most damaging rays that fade carpets and draperies.

Importance of Laminated Glass

During a storm, if a building is breached through a broken window or doorglass, wind may enter the structure and cause an increase in air pressure. This vacuum effect could lift the roof and collapse the walls. Laminated glass helps to preserve the building envelope, keeping the wind and other elements outside.

Opaque Six Panel Doors STORMFORCE Package

STORMFORCE Opaque Impact Rated doors are ideal for coastal areas with the highest exposure to tropical storms and hurricanes. Opaque impact rated doors are also recommended for other areas of the country that experience occasional severe weather conditions.

STORMFORCE

Impact Fiberglass Entry Doors

Five decorative glass patterns are part of the STORMFORCE fiberglass entry door program. All patterns are available in Full Lite and Full Sidelite styles. Doors are available in Oak woodgrain texture only, and only in 36" Width.

STORMFORCE

Impact Fiberglass Entry Doors

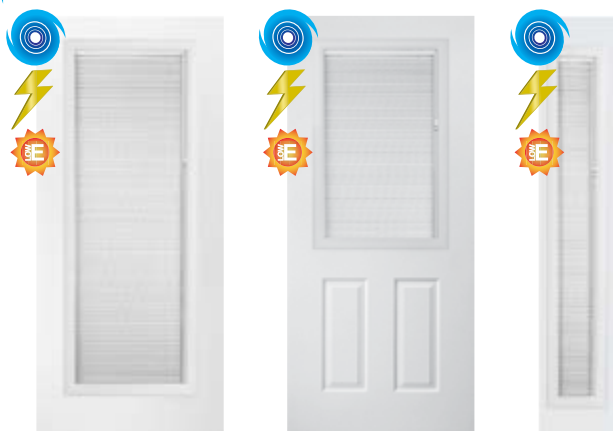

In addition to multiple decorative doorglass options that are certified for use in coastal areas, entry systems featuring traditional classic glass sandwiched around a clear, difficult-to-penetrate laminate layer are also available. Customization is possible with multiple options including decorative grid systems and behind-the-glass blinds.

Severe Weather Laminated Glass Option

Stormforce Classic Glass Doors With Blinds

Blinds are located behind the glass and are controlled by a single operating lever. Blinds raise, lower and tilt.

Stormforce Classic Glass Doors With & Without Internal Grids

Internal grids on STORMFORCE doorglass are 5/8" flat. Contoured grid style not available.

Turtle Glass

Thousands of marine turtles nest in U.S. coastal areas. State and local ordinances protect hatchling turtles by limiting brightness of inside-to-outside visible light transmittance. Selected styles of Classic Glass STORMFORCE entry doors and Classic Glass doors with the Severe Weather glass option can include tinted grey glass that meet these requirements.

Severe Weather Laminated Glass is available on select non-impact rated door styles. The lightning bolt symbol indicates availability.

Trilennium

Multi-Point Hardware

Standard on 8/0 Doors
Optional on 6/8 & 7/0 Doors

Trilennium™ multi-point hardware system provides more than just security. It offers homeowners better door closure and sealing than a single point lock. Three points latch and all three points deadbolt with a 1" throw. Deadbolts include anti-saw hardened steel pin. Includes 10-year warranty on finish, materials and workmanship.

Peace of Mind

One solid unit with three latches based on the strength of patented I-Beam construction for reliable, proven performance.

Security

Operating as one, all three latches engage when the door is closed. One movement of the thumbturn or key activates all three deadbolts. Activated, each latch is a deadbolt and cannot be compromised.

▶ Patented Strike Rollers

Patented strike rollers and latches draw the door into perfect alignment with the jamb for a tight seal with no deflection.

▶ Panic Release

A single downward turn of the lever releases all three deadbolts.
