# We are Rogue Valley Door

*America's largest builder of wood doors.*

## It Starts With a Vision

In 1985, John Dunkin and his team of designers and craftsmen began creating custom doors and entrances in Grants Pass, Oregon. The goal was not only to offer a top-quality product, but also doors that were expressions of their customers' unique tastes. Drawing inspiration from the natural beauty of Southern Oregon's majestic scenery, Rogue Valley Door quickly built a reputation by combining innovation and artistry with highly crafted precision.

Since then, Rogue Valley Door has grown into America's largest builder of wood doors. Today, our master craftsmen utilize the finest American materials, state-of-the-art milling technology and our 350,000 square foot facility to produce the best doors in the world. We invite you to review our collection, experience our tradition and create your own vision for your home.

# Our Commitment

*We are committed to the environment and the industry.*

## RVD Supports Realistic Environmental Practices and Sustainable Forestry Management

We support the endeavors of Leadership in Energy and Environmental Design (LEED), Forest Stewardship Council (FSC), American Forest and Paper Association (AF&PA), Oregon Forest Resources Institute (OFRI), National Association of Home Builders (NAHB), and the Sustainable Forestry Initiative (SFI) in their efforts to optimize and manage the use of our forests.

Rogue Valley Door will continue to be environmentally sensitive not only in the wood products we use, but also as corporate citizens.

## Continuing Education for Architects

### AIA Accreditation

Members of The American Institute of Architects (AIA) have access to the institute's Continuing Education System (CES). This program was developed by the AIA to help members meet their state mandatory continuing education (MCE) requirements and to help them fulfill their AIA continuing education requirement for membership renewal.

Most state licensing boards with MCE requirements recognize AIA/CES as the primary source of continuing education for their licensed architects.

Rogue Valley Door is proud to sponsor an AIA continuing education course for architects. For more information, contact your local Rogue Valley Door dealer, or contact us at [info@roguevalleydoor.com](mailto:info@roguevalleydoor.com).

The mark of  
responsible forestry

## FSC Certification

Forest Stewardship Council's (FSC) mission is to promote and enhance well managed forests through credible certification that is environmentally responsible, socially acceptable, and economically viable. Rogue Valley Door's FSC certification ensures our wood doors were made using only legally harvested wood, from sustainable forests.

*Ask your Rogue Valley Door dealer about how to special order your door with a FSC certification.*

## Our Commitment

*Rogue Valley Door is committed to promoting and protecting America's greatest renewable resource by being a responsible steward of our forestlands.*

# What Makes Us Different

*We're America's largest builder of wood doors for a good reason. Here are just some of them.*

## ■ Made in the U.S.A.

Our doors are proudly made in America using only domestically manufactured components.

## ■ Variety of Wood

We offer over 40 wood species to choose from, including doors constructed of multiple woods – finished, stain-ready or primed to paint.

## ■ Variety of Glass

Rogue Valley Door gives you a choice of 23 different glass treatment options, custom etched glass, and our Cielo Series.

## ■ Fire Doors

Available in a variety of species, we make fire doors with 20, 45, 60 and 90 minute fire-resistance ratings.

## ■ Substantial Veneer

While a majority of imported doors use veneers as thin as 1/50 of an inch, Rogue Valley Door uses nothing less than sturdy 1/16-inch veneer on all stiles and rails.

## ■ Pre-Hanging & Machining

We provide pre-hanging and machining of fire doors, shaped doors, radius top doors, commercial doors and more.

## ■ CAD Drawings

A valuable tool for architects, interior designers and homeowners, Rogue Valley Door offers CAD drawings to address all construction issues up front.

## ■ Specialty Millwork

We offer specialty millwork from matching species to complement your custom door, frames, shelves, transoms and more.

## ■ Express Program

When you need a custom door quickly, we can have it ready to ship in 7 days with our Next Week Express, or 14 days with our Economy Express. (Some restrictions may apply.)

## ■ FSC Certified Product

As an option, we can manufacture FSC-certified doors made only of wood harvested from sustainable forests.

# Choose Your Perfect Door

*Selecting just the right doors for your home has never been easier.*

*Although the selection of doors in this catalog is extensive, it doesn't begin to illustrate all of the possibilities. That's for you to decide. Whether you're interested in combining different woods, substituting wood panels for glass, need fire-rated doors, or simply want us to make a great door even better, we make the process easy.*

## Using Our Helpful Guide

Throughout our catalog, we've placed icons next to each door to note all of your available options. When you see a door you like, come back to this guide for easy reference.

### Rogue Premium Options

*Make a great door even better with Rogue Premium Options. Our flagship collection of upgrades sets new standards in quality by combining the finest materials and construction techniques to bring you unsurpassed durability and lasting beauty.*

### All Sizes

*From grand entryways to small closets, Rogue Valley Door can create a door to fit any application. Combine that with the ability to design custom shapes, and there's no door we can't build.*

### Fire-Rated

*Rogue Valley Door provides exterior and interior fire doors with a 20, 45, 60 or 90-minute fire rating. Our fire-rated doors match their counterparts visually, while complying with all code requirements.*

### All Glasses

*Bring in the light with our great selection of clear, opaque, etched or textured glass treatments. Any panel from our wood door designs can be replaced with your choice of glass.*

### All Woods

*Choose from dozens of species to find the right look and feel for your home. Or, combine complementary or contrasting woods in one door to make a bold and stylish statement.*

Doors 4501 (8/0) shown in  
Knotty Alder  
See page 77

# Introducing Rogue Premium Options

*Rogue Valley Door is proud to present a package of options to upgrade any door in our line.*

## Rogue Premium Options

*Rogue Premium Options set new standards in durability and long-lasting beauty. Combining superior materials, state-of-the-art construction and unsurpassed craftsmanship, Rogue Premium Options provide enduring elegance. Designed to stand up to both Father Time and Mother Nature like no other door, we back our Rogue Premium 1/4-inch veneer and solid wood options with a limited 5-year warranty. Select a great door. Then, make it even better with your choice of our Rogue Premium Options.*

### The Rogue Premium Difference

#### Thicker Veneer Option

Many door companies build their doors with paper-thin veneer. At Rogue Valley Door, we use nothing less than 1/16-inch, which provides excellent strength, look and feel. We believe anything less runs the risk of veneer bubbling, core bleedthrough or separation over time. With our Rogue Premium Thicker Veneer Option choose from a substantial 1/4-inch thick veneer or a solid door made from two pieces of laminated lumber. These sturdier options provide superior resistance to inevitable wear and tear. If a compression or scratch occurs, our thicker veneers make for a much easier repair.

#### Stain Grade Option

When you order the Rogue Premium Stain Grade Option, you can rest assured that you're getting the finest cut of veneer possible. The wood for these doors is hand-selected to be flawless and free of all imperfections. If knots are not a

Our 1/16" Veneer

Rogue Premium 1/4" Veneer

Rogue Premium Solid Wood

*Dowel pin inlays give our Rogue Premium doors an aesthetically pleasing authentic look.*

characteristic of the wood, we won't use it. If there are abnormal color variations or streaking in the grain, it won't make the cut. The doors you choose are uniquely yours by design. With our Stain Grade Option, you're ensured that the wood will be as aesthetically pleasing as the door you created.

### Color Match Option

When you choose the Rogue Premium Color Match Option, we hand-sort the lumber and veneer to achieve an even and uniform color from one component to the next. This process will ensure that your beautiful new door will have the consistent color that you were looking for. Whether you prefer a lighter or darker shade of wood, we'll provide the perfect match. The Rogue Premium Color Match Option gives you the flexibility to design your perfect door.

### Face Pin Inlays Option

Our stile and rail doors are built using classic cope and stick construction. This time-tested design combined with modern construction techniques provides unsurpassed strength and stability. Because we use a 5/8" x 5" fluted dowel to pin critical joints, it is no longer necessary to use mortise and tenon joints with face pins. But our customers have found that our Rogue Premium Face Pin Inlays Option provides an aesthetically pleasing authentic look. Using both round and square face pins, we provide another option that reflects a level of craftsmanship that never goes out of style.

# Variety of Sizes and Fire-Rated

*With Rogue Valley Door, choosing the perfect door for your home has never been easier.*

## All Sizes

*Entries come in all shapes and sizes. Whether it's the main entrance to your home or a unique closet space, Rogue Valley Door provides an array of door sizes and thicknesses. From dozens of wood species and glass doors in a myriad of treatments, to French doors, fire-rated doors and even louvered doors, we can create them in any size to fit your specifications. We also build custom interior and exterior doors to accommodate any shape. If you're building or remodeling, add character to your home with one-of-a-kind doors fashioned to fit your personal taste.*

Rogue Valley Doors come in all sizes, from up to 2¼" thick, to 8' wide, to 14' tall. Just let us know how we can build the perfect door to fit your needs.

*Rogue Valley Door provides exterior and interior fire doors with a 20, 45, 60 or 90-minute fire rating on our most popular styles, including up to 3/6 x 8/0 single doors or 7/0 x 8/0 double doors.*

## ■ Fire-Rated

*Doors play an important role in limiting the danger and damage from fires. At Rogue Valley Door, we not only take great pride in meticulous craftsmanship and artistry, but also in building doors that provide you with today's most advanced fire safety standards.*

*Our most popular door styles - including up to 3/6 x 8/0 single doors or 7/0 x 8/0 double doors - can be built to comply with all code requirements.*

*By constructing doors with 20, 45, 60 or 90-minute fire ratings and beautiful, substantial veneers, we're proving that safety and style can come together beautifully.*

# Choose From Glass Options

*Bring light into any room with our imaginative array of glass treatments.*

## All Standard Glass Options

*From tinted to opaque to textured, Rogue Valley Door gives you a choice of 23 stylish glass options for just the right look.*

**White Laminate**

This safety glass is made by sandwiching a white film between clear panes.

**Satin**

Light and privacy combine in this translucent, semi-opaque glass treatment.

**Clear**

A clear pane of glass that provides classic, transparent simplicity.

**Mist Lite\***

A tight criss cross treatment on a clear glass pane that is mostly opaque.

**Grey**

A clear glass treatment with a subtle grey hue that is fully transparent.

**Delta Frost**

A fairly opaque, frosted glass treatment with a unique, random texture.

**Rain**

A vertical treatment resembling raindrops that is fairly opaque.

**Seedy Baroque**

Clear glass with a scattered look, baroque wash and asymmetrical curves.

**Bronze**

A clear, mostly-transparent glass with light bronze undertones.

**Reeded\***

An elegant vertical line treatment that is fairly transparent.

**Bevel**

A clear, tempered glass with a striking beveled edge.

**Evergreen**

A clear glass treatment with subtle green highlights that is mostly transparent.

**Obscure-P516**

A pebbled or "orange peel" treatment that is mostly opaque.

**Glue Chip**

A stylish frosted treatment that is fairly opaque.

**Bamboo\***

A unique pattern with vertical bamboo reeds and leaves. Fairly opaque.

Doors 4501 (8/0) shown  
in Mahogany with Custom  
Decorative Glass  
See page 77

**Double Glue Chip**  
Glue chipped twice to obtain a denser, more concealing look than standard glue chip.

**Monumental**  
A semi-transparent with a distinctive pattern offers privacy and natural light.

**Solar Bronze**  
A mirrored exterior effect that provides a clear, bronze-tinted view from inside.

**Cross Reed\***  
A semi-transparent, clear glass with a vertical and horizontal pattern.

**Sycamore**  
Leaf impressions offer soft obscurity while allowing an abundance of light to travel throughout the room.

**Taffeta**  
Reminiscent of taffeta fabric, this radiant glass offers privacy without obscuring natural light.

**IG w/Bronze GBG**  
Insulated glass divided by a bronze internal grid to simulate a door with multiple lights.

**IG w/White GBG**  
Insulated glass divided by a white internal grid to simulate a door with multiple lights.

**Heavy Water**  
A clear pane with a distorted treatment that gives the illusion of being under water.

For more Glass Options, see our Cielo Collection on page 118.

*\*These glass options are NOT recommended for Multi Light Doors.*

# Choose From Standard Wood Options

# Imagine It and We Can Build It

*Explore the countless possibilities with interior and exterior doors, which can be customized just for you.*

## We Invite Freedom of Expression

Your home is a reflection of your lifestyle. From outdoor landscaping to interior design, your imagination is what turns a house into a home. Enhancing it with custom doors makes a bold statement and puts the finishing touches on your creation. Considering Rogue Valley Door offers a multitude of custom styles and shapes using a wide variety of wood species and glass treatments, the possibilities are endless. Whether you're an architect, a builder or a homeowner, we offer not only the finest wood doors available, but also the opportunity for you to design your own. If you can imagine it, we can build it.

## Open the Door to Your Creativity

When you partner with Rogue Valley Door, our goal is to excite, inspire and provide you with the creative tools to design doors as unique as you are. From initial sketches, we generate a precise CAD drawing. From there, the design is sent along to our craftsmen. With great pride and attention to detail, we incorporate the materials you choose, build it to your precise specs and have it ready to ship within weeks. To explore the possibilities and see how simple we make the process, visit us at [www.roguevalleydoor.com](http://www.roguevalleydoor.com) and click on Door Builder.

# Interior Doors

## *From Practical Value to Elegant Entryways*

Complement your interior design with the beauty, form and function of Rogue Valley Door interior doors.

Interior doors are a big part of your interior design. A room's color, furnishings and décor can be greatly enhanced with the right door. Doors can make bold statements or subtle expressions. They provide a first impression and a finishing touch. Whether you're remodeling, building or reinventing the look of your home, Rogue Valley Door invites you to peruse our collection, let your imagination go and consider the possibilities.

From the practical value and comfort of our Sustainable Designed Fiberboard (SDF) doors to rustic, grooved-panel or traditional designs, Rogue Valley Door offers a great variety of options for many applications. Imagine a French door entry to the den, an elegant carved door to the master suite or even a whimsical chalkboard door to your child's bedroom. Enhance the look of your home with well crafted, quality interior doors.

# Specialty Doors

*Be an interior design trendsetter with our extensive collection of specialty doors.*

21st Century performance meets Old World authenticity.

Our energy-efficient Simulated Divided Light (SDL) doors have a divided light appearance, created by applying wood barwork to the face of the glass. Rogue Valley Door has customized this technology, so you can choose from our standard collection of doors, or create a design with custom-shaped barwork to fit your style.

Usher in the beauty of nature with our exclusive Cielo Collection.

Lumicor's patented technology presents a new class of architectural resin panel material that captures the beauty of natural botanicals, fine textiles, decorative papers and architectural metals within high-performance translucent resins. At Rogue Valley Door, we've taken this technology and incorporated it into our finely crafted doors to create the Cielo Collection. Intended for interior use, the Rogue Valley Door Cielo Collection has captured real world materials, colors and textures to complement the latest design trends.

Bring imaginative additions to any space with our fun and functional Dutch and Café doors.

Classic Dutch doors are a great option to give any room or entrance an added touch of style. These doors can act as two separate sections or easily function together as a whole. And, almost any door we make can be made into a Dutch door. For your kitchen or any room you'd like to feature a "push-through" entry, our café doors provide a fantastic enter-and-exit option.

# Door Resources

*To ensure precise operation and long-lasting beauty, we've included these valuable reference guides.*

More than the best doors in the industry

At Rogue Valley Door, we offer more than the best doors in the industry; we develop relationships with our customers. We're here to answer questions, provide guidance and make sure our products bring you years of genuine satisfaction. For more information, visit a Rogue Valley Door dealer, or contact us at [www.roguevalleydoor.com](http://www.roguevalleydoor.com).

# Pre-Hung Doors & Machining

*To avoid any complications on your end, we offer complete machining and pre-hanging services.*

## Pre-Hung Doors

A door should consistently snap into place, clear its jamb, and swing effortlessly on its hinges. The fine tolerances needed to achieve this kind of performance help explain why a pre-hung door is a precision instrument.

Rogue Valley Door has the capability to assemble the jambs, cut for hinges and door knobs, and pre-hang any of our doors for ease of installation. Interior doors, exterior doors, 2-1/4 thick doors, fire doors, radius doors, and clipped corner doors are just a few of the units that we can create in our shop.

## Machining Services

From small residential jobs to large resort and hospitality projects, Rogue Valley Door has a complete range of factory machining services.

Provide us with your machining specifications, and allow us to save you time, eliminate problems of on-site machining, and reduce your overall costs. Our machining services include:

- Cylindrical Lock Preps
- Mortise Lock Preps
- Electronic Lock Preps
- Hinge Preps
- Strike Preps
- Wire Chase Preps
- Flush Bolt Preps
- Concealed Overhead Door Preps
- Door Bottom Preps
- Exit Device Preps
- Multi-Point Locking Preps
- Concealed Vertical Rod Preps

We machine for multi-point locks from W&F and Hoppe.

# Millwork Capabilities

*Every Rogue Valley Door, even the custom shaped doors, can have matching handcrafted millwork, an elegantly carved profile on each portion of the door, including the frame, the jamb, and the door stop.*

# Glass Care Instructions

## *Quick Reference Guide to Cleaning Architectural Glass Products*

### Glass Care Dos and Don'ts

#### Dos:

- Clean glass when dirt and residue appear.
- Determine if coated glass surfaces are exposed.
- Exercise special care when cleaning coated glass surfaces.
- Avoid cleaning tinted and coated glass surfaces in direct sunlight.
- Start cleaning at the top of the building and continue to lower levels.
- Soak the glass surface with a clean water and soap solution to loosen dirt and debris.
- Use a mild, non-abrasive commercial window cleaning solution.
- Use a squeegee to remove all of the cleaning solution.
- Dry all cleaning solution from window gaskets, sealants and frame.
- Clean one small window and check to see if procedures have caused any damage.
- Be aware of and follow the glass supplier's specific cleaning recommendations.
- Caution other trades against allowing other materials to contact the glass.
- Watch for and prevent conditions that can damage the glass.

#### Don'ts:

- Don't use scrapers of any size or type for cleaning glass.
- Don't allow dirt and residue to remain on glass for an extended period of time.
- Don't begin cleaning glass without knowing if a coated surface is exposed.
- Don't clean tinted or coated glass in direct sunlight.
- Don't allow water or cleaning residue to remain on the glass or adjacent materials.
- Don't begin cleaning without rinsing excessive dirt and debris.
- Don't use abrasive cleaning solutions or materials.
- Don't allow metal parts of cleaning equipment to contact the glass.
- Don't trap abrasive particles between the cleaning materials and the glass surface.
- Don't allow other trades to lean tools or materials against the glass surface.
- Don't allow splashed materials to dry on the glass surface.

# Calculating Door Overhang

*Adequate overhang is very critical to the life and performance of a wood stile and rail door.*

## Appropriate Overhang Calculation

Adequate overhang is very critical to the life and performance of a wood stile and rail door. A proper overhang will help protect your door from the elements and extend the life of the door. In most climate conditions the following formula can be used to determine the appropriate amount of overhang:  $X=1/2Y$  (where X is the length of the overhang required and Y is the distance from the bottom of the door to the base of the overhang.) For example, if the measurement from the bottom of the door to the base of the overhang is 8 feet, the the required overhang is 4 feet. For more severe climates, very wet or dry areas, the following formula should be used:  $Y=X$ .

# Handling, Installation & Finishing

*Wood stile and rail doors are a reflection of quality and good taste. To ensure you obtain the maximum enjoyment and utility of your door, follow these guidelines.*

*Please read and follow the guidelines detailed below. Failure to follow the guidelines below will invalidate our Limited Warranty. It will be the discretion of Rogue Valley Door or its representative to approve or reject any claim due to poor handling, application, installation or finishing.*

## Door Handling Guide

1. Handle all doors with clean gloves and equipment.
2. Avoid dragging doors across one another or across other surfaces. Avoid leaning at a steep angle.
3. Store on a level surface in a dry, well-ventilated building. Avoid stacking on end.
4. Cover doors to keep clean, but allow air circulation.
5. Doors should not be subject to abnormal heat, dryness, or humidity for prolonged periods. Avoid sudden changes such as forced heat to dry out a building.
6. Deliver doors in a clean truck and under cover from wet weather.
7. Deliver door to building site only after plaster, stucco, and/or cement is dry.
8. If the doors are to be stored for long periods or on the job site, the entire door including the top and bottom edges must be sealed in order to prevent undue moisture absorption.
9. Door shall not be exposed to excessive moisture (above 55% RH), excessive heat (90 degrees F), and dryness (30%RH).

## Door Fitting & Hanging Guide

1. All wood doors should be conditioned to average prevailing relative humidity of the locality before hanging.
2. When hanging door, allow adequate clearance for swelling of door or frame in extremely damp weather.
3. All exterior glazed doors should be hung with the removable wooden bead facing the interior side of the opening.
4. Avoid cutting doors down in size, use designated sizes. If width trim is necessary, do not trim more than 1/4" per side. Top of door may be trimmed 1/2" and the bottom no more than 1-1/2". Use a sharp, fine tooth saw for best results.
5. Caution must be used to avoid impairing the utility or structural strength of the door when fitting for hardware, lites, louvers, panels, and/or any other special detail.
6. Be sure the jambs and stops are set perfectly square and plumb.
7. Immediately after fitting, cutting for closures, weather-strip and/or threshold and before hanging any interior or exterior door on the job, the entire door including top and bottom edges must be sealed to prevent undue absorption of moisture.

## Door Preparation For Finishing Guide

1. Adjust or align components if necessary.
2. All doors manufactured by Rogue Valley Door require sanding prior to finishing. The degree of pre-sanding will depend upon the owner's selection of stain and whether or not they are spraying or wiping on the stain.
3. Remove all handling marks, instruction labels, stamps and effects of exposure to moisture with a thorough, final light sanding over all surfaces of the door, using 180 grit sand paper. Note Small amounts of grease, oil or pitch can be wiped clean with mineral spirits.
4. Clean door thoroughly after sanding to remove all dust or foreign material. Avoid using chemical cleaners that react unfavorably to certain wood species and finishes. Consult a finish expert. Note: Some hardwood species can have an adverse reaction with certain chemical cleaners and finishes.
5. Apply finish as soon as door is fitted, but before final hanging. Cutouts for hardware must be sealed prior to installation. Rogue Valley Door will not warrant product that has been hung prior to finishing or that shows deterioration of wood or swelling due to finish breakdown.
6. Make sure all surfaces are sealed and finished, including top, bottom, and side edges of the stiles and rails.
7. It is the finisher's responsibility to cover the glass during the finishing process. On doors ordered with plastic film, removal of the film immediately after finishing is required. Failure to remove the film in a timely manner may result in difficulties in removing the film at a later date. Do not use razors or other sharp object to remove the film or clean the glass. These items may scratch the glass.

## Exterior Door Finishing Guide

**Caution:** *If during the finish process you are having some issues with your door, stop finishing immediately and contact the company from where you purchased the doors.*

### Stain & Clear Finish

The top coats should be a solvent-borne (oil-base, alkyd resin base, polyurethane resin-base) or a water-borne (latex resin-base) clear finish. The advantages of a solvent-borne clear finish is they are faster drying, harder, and more water resistance. The advantages of a water-borne clear finish is they are very flexible, ultraviolet resistance, and have good exterior durability. Note: Lacquer-base toners or finishes should not be used on exterior doors.

1. Depending on the type of stain being applied, the door may need to be prepped with a wood conditioner or sanding sealer prior to applying stain. Verify with the stain and top coat manufacturer's instructions.
2. Doors should be sealed with at least three coats of a good quality exterior solvent-borne or water-borne clear finish.
3. Sand lightly between top coats, making sure that all surfaces and edges are covered every time a coat is applied. Clean door of dust before applying the next coat.
4. To minimize moisture penetration where wood parts or glass and wood come together, be sure enough top coat is applied to form a bridged film across any voids. Make sure that the finish does not prevent movement of the floating panels.
5. You can make sure all coatings in the finish system are compatible by using products from the same manufacturer. Finish manufacturers will be able to tell you which of their products may be successfully applied in combination with each other. Finishes should be applied in accordance with the manufacturer's instructions.
6. Dark colored stains should not be used on doors exposed to sunlight, as expansion and contraction of door components may occur.
7. A substantial overhang and protection from the elements will minimize component movement inherent in exterior wood doors.

### Paint Finish

Oil-base or latex resin-base exterior grade primer and paints may be used on wood doors. Oil-base primer and paints offer more resistance to moisture penetration, and latex resin-base primer and paints will offer better durability and color retention.

1. Doors should be sealed with a good quality exterior primer followed by at least two topcoats of either an oil-base or latex resin-base exterior paint.
2. Sand lightly between coats, making sure that all surfaces and edges are covered every time a coat is applied. Clean door of dust before applying the next coat.
3. To minimize moisture penetration where wood parts or glass and wood come together, be sure enough paint is applied to form a bridged film across any voids. Make sure that the finish does not prevent movement of the floating panels.
4. You can make sure all coatings in the finish system are compatible by using products from the same manufacturer. Finish manufacturers will be able to tell you which of their products may be successfully applied in combination with each other. Finishes should be applied in accordance with the manufacturer's instructions.
5. Dark colored paints should not be used on doors exposed to sunlight, as expansion and contraction of door components may occur.
6. A substantial overhang and protection from the elements will minimize component movement inherent in exterior wood doors.

### High Exposure Finishing

1. Use silicone caulking around the perimeter of each glass pane. This will seal the putty and prevent any moisture from penetrating the door.

# Handling, Installation & Finishing

(continued)

2. Use silicone caulking around the perimeter of each panel. This will seal the panel joint and help prevent moisture from penetrating the door.
3. Allow any finish to flow onto the glass area at least 1/16 inch.
4. Storm door may be required to completely eliminate moisture problems. If storm door is used, it must be ventilated to eliminate heat build-up.

## Maintenance

Your Rogue Valley Door will need some periodic maintenance to help insure that it has adequate protection against the elements. This regular maintenance is required for the warranty that is provided with every Rogue Valley Door. Some of the following signs are indicators that it is time to re-finish your Rogue Valley Door: chalkiness in finish, flaking of finish, hairline cracks in the finish, and changes in the color of the finish.

## Interior Door Finishing Guide

**Caution:** *If during the finish process you are having some issues with your door, stop finishing immediately and contact the company from where you purchased the doors.*

### Stain & Clear Finish

A solvent-borne system is recommended for interior door applications, and may be that of a lacquer-base.

1. Depending on the type of stain being applied, the door may need to be prepped with a wood conditioner or sanding sealer prior to applying stain. Verify with the stain and top coat manufacturer's instructions.
2. Doors should be sealed with at least two coats of a good quality exterior solvent-borne or water-borne clear finish.
3. Sand lightly between top coats, making sure that all surfaces and edges are covered every time a coat is applied. Clean door of dust before applying the next coat.
4. You can make sure all coatings in the finish system are compatible by using products from the same manufacturer. Finish manufacturers will be able to tell you which of their products may be successfully applied in combination with each other. Finishes should be applied in accordance with the manufacturer's instructions.

### Paint Finish

Oil-base or latex resin-base primer and paints may be used on wood doors. Oil-base primer and paints offer more resistance to moisture penetration, and latex resin-base primer and paints will offer better durability and color retention.

1. Doors should be sealed with a good quality primer followed by at least two topcoats of either an oil-base or latex resin-base paint.
2. Sand lightly between coats, making sure that all surfaces and edges are covered every time a coat is applied. Clean door of dust before applying the next coat.
3. You can make sure all coatings in the finish system are compatible by using products from the same manufacturer. Finish manufacturers will be able to tell you which of their products may be successfully applied in combination with each other. Finishes should be applied in accordance with the manufacturer's instructions.

**IMPORTANT:** *We strongly urge you to read and follow the guidelines detailed above. Failure to follow the guidelines above will invalidate our Limited Warranty. It will be the discretion of Rogue Valley Door or its representative to approve or reject any claim due to poor handling, application, installation or finishing.*

# Rogue Valley Door Warranty

*Rogue Valley warranty information for your door*

## Limited Warranty

All stile and rail door products manufactured by Rogue Valley Door meet or exceed generally accepted industry standards. Rogue Valley Door warrants that at the time of shipment, each door is fabricated with good material and workmanship and is free of defects which would cause the door to be unfit for the ordinary recommended use. Specific warranty periods for doors, door components, and exclusions are as follows:

### One Year Exterior Door and Fire Door Limited Warranty

For doors used in an exterior application or interior fire door application will be warranted for one year from the date of shipment from the factory. This warranty applies only to doors that have been properly handled, finished, and for exterior doors installed with a proper overhang in accordance with the Rogue Valley Door Handling, Finishing, and Installation Guidelines.

### Ten Year Interior Door Limited Warranty

For doors used in an interior application will be warranted for ten years from the date of shipment from the factory. Interior application is defined as having a controlled interior climatic conditions on both sides of the door. The ten year warranty does not apply to fire rated doors, doors with Cielo panels, or doors used in commercial, hospitality, or multi-family applications, in which case the one year warranty will apply. The ten year warranty only applies to the original purchaser, and is non-transferable.

### Five Year Rogue Premium Limited Warranty

For doors manufactured using the Rogue Premium construction methods using either 1/4" veneer or solid face laminated stiles and rails. This warranty applies only to doors that have been properly handled, finished, and for exterior doors installed with a proper overhang in accordance with the Rogue Valley Door Handling, Finishing, and Installation Guidelines. The five year warranty only applies to the original purchaser, and is non-transferable.

### Five Year Insulated Glass Limited Warranty

Rogue Valley Door warrants that any of our Insulated glass units will not develop a visual obstruction between the two panes of glass caused by the failure of the seal. Rogue Valley Door liability to a seal failure will be to send out a replacement glass unit.

## Warranty Exclusions

**The following are not considered a defect in your Rogue Valley Door, and are not covered by this written warranty:**

1. Failure to properly seal all six edges of the door. The door must be properly finished immediately after fitting and hanging.
2. Natural color or texture variations in the wood.
3. Expansion of bottom rail due to climate conditions is not considered a defect.
4. Damage caused from extreme heat build up where a storm door is being used.
5. Failure to perform routine homeowner's maintenance.
6. Damage from improper storage or handling of the doors.
7. Panel shrinkage is not considered a defect.
8. Failure to have adequate overhang, see page 175 for details.
9. For doors 3/0 x 7/0 or smaller, warp not exceeding 1/4" in the plane of the door. For doors larger than 3/0 x 7/0 warranty against warp does not apply. Warranty will apply for doors up to 3/6 x 8/0, warp not exceeding 3/8" in the plane of the door if properly installed with a three-point locking mechanism. Action on any claim for warp may be deferred for a period of up to 1 year, in order to permit conditioning and equalizing to humidity and temperature conditions.
10. Doors larger than 3/6 x 8/0 x 2-1/4 are not covered under this warranty.
